

# The Implant Treatment Pathway

## 1. INITIAL FREE CONSULTATION

---

Written summary sent to patient and referring dentists

## 2. HEALING REVIEW &/OR DIAGNOSTICS

---

Clinical and radiographic (CBCT scan) review proposed site 8 weeks post extraction, for multiple teeth a diagnostic 'mock up'

## 3. IMPLANT PLACEMENT

---

Under strict aseptic conditions

## 4. IMPLANT EXPOSURE

---

Generally 6-8 weeks after placement, 12 weeks if bone augmentation was necessary

## 5. RESTORATIVE STAGES

---

By Audley Dental Solutions or by referring GDP with support from Chris or Martina

## 6. REVIEW

---

1 year post treatment completion, OH reinforced, "Biological stability" confirmed

The patient will be given a guide to cost at the initial consultation. A fixed quote will be provided once a definitive treatment plan has been agreed (which may be after any necessary diagnostic work eg CT scan or 'mock up').

We use the latest techniques 3D imaging (following ADI guidelines) to carefully plan implant surgery.

At the end of restorative treatment, a letter with relevant radiograph will be forwarded to the referring clinician. The relevance of scrupulous oral hygiene will have been emphasised to the patient.
